---

## //Skills

HTML5 • CSS3 • Bootstrap • JavaScript: JQuery, Angular, Express, React, Node.js • Ruby: Ruby on Rails, Sinatra • Databases: PostgreSQL, MongoDB • Version Control: Git, Github • Design: Photoshop, Illustrator, InDesign

---

## //Relevant Experience

### General Assembly - Student 9/16 - 12/16

Immersive 3 month course study in front and back-end development, covering best practices in Object-Oriented Programming, MVC frameworks, and user experience. Projects include:

**Stock Alerts:** MEAN stack app that allows users to generate custom stock alerts, with realtime data pulled from the Yahoo Finance API. User authentication allows stock picks to be stored securely on the database.

**Showspace:** Ruby on Rails calendar app that lists upcoming shows by local artists. Users can create shows and artist profiles and add multiple artists to a show's lineup. Artists, shows, and performances are managed with a PostgreSQL database.

## //Work Experience

### Freelance - Consultant 3/12 - present

- Meet with non-profits, startups, and small businesses to outline financial challenges facing their organization, and work with them to design roadmaps, craft budgets, and produce financial reports.
- Work with individuals to assess financial priorities and present options for managing their loans and investments.
- Clients include: Howard St. Incubator, Boone St. Farm, Music Beat LLC, Ideas for Housecrafts, Wham City Lights, and Mars Attacks LLC.

### Mars Attacks – Project/Tour Manager 9/12 - 9/16

- Managed budget for a touring musician's small business. Streamlined accounting procedures and developed systems for gathering sales data.
- Coordinated logistics for two national tours and one-off performances, managing a team of eight crew members.
- Rolled out several product lines for e-commerce and in-person sales.
- Managed website and mailing list content.

---
