//About

As a full-stack developer with a background in computer music, I bring a creative approach to coding with new frameworks and technologies. I like to dive into problems, figure out how things work, and use that knowledge to build something new.

//Skills

HTML/CSS • JavaScript: JQuery, Angular, Express, React, Node.js • Ruby: Rails, Sinatra • Databases: PostgreSQL, MongoDB/NoSQL • Testing: Rspec, Capybara • Version Control: Git, Github • Organizational and budget management skills

//Experience

General Assembly - Student 9/16 - 12/16
Immersive 3 month course study in front and back-end development, covering best practices in Object-Oriented Programming, MVC frameworks, and user experience. Projects include:

Showspace: Ruby on Rails powered calendar app featuring user generated artist profile pages and upcoming performances for Baltimore-based musicians.

Drift: Group project showcasing RESTful web services with an Angular front-end and a Rails custom API. Divided responsibilities and devised Github workflows for collaborative development.

Mars Attacks – Project/Tour Manager 9/12 - 9/16
Managed budget for a touring musician's small business.
Coordinated logistics for national tours and one-off performances.
Developed systems for collecting sales and accounting data and made actionable goals based on that data.
Communicated priorities to team members and subcontractors to complete projects efficiently.

Wham City Lights - Office Manager & Audio Lead 2/13 - 2/15
Accounting and budget planning for VC-funded tech startup.
Served as client production liaison, coordinating technical needs for experimental audio tech used by corporate clients (Disney Music Awards, America's Got Talent, Cisco, Budweiser).
Interfaced with production teams to integrate our technology into their performance.

//Education

General Assembly - Washington, DC
Web Development Immersive

Purchase College - Purchase, NY
BA, Music Composition and Production, Magna Cum Laude
